ceia3

BRINGING THE KNOWLEDGE TO
THE AGRIFOOD SECTOR

The International Agri-Food Excellence Campus (ceiA3), comprising the Universities of Almería, Cádiz, Córdoba, Huelva and Jaén, with IFAPA as an affiliated centre, is internationally recognised as a leading reference hub in the agri-food sector. The campus is governed by its own management body, the **ceiA3 consortium**, which aims to foster training, knowledge transfer, internationalization, and collaboration among researchers affiliated with the campus. Notably, the **Bioeconomy** is a key strategic specialisation area, aligned with the **Andalusian Circular Bioeconomy Strategy**.

STRATEGIC PILLARS

- Education and Training.
- Research, Innovation, and Knowledge Transfer to the Agrifood Sector.
- Engagement with the Territorial Environment and Society.
- Internationalisation.

ceiA3 CLUSTER

- Food and Health.
- Sustainable Agriculture.
- Animal Biotechnology.
- Plant Biotechnology.
- Food Safety.
- Agri-food Technology and Bioenergy.
- Agri-food Economics and Law.

STRATEGIC AREAS

bioeconomy

CEI A3'S STRATEGY

ceiA3 and Bioeconomy

OBJECTIVES

- Alignment with regional and European policies.
- Enhancement of visibility and positioning at the European and national levels of the excellence in research and innovation conducted by the universities and associated centers of ceiA3.
- Strengthening and promotion of training and development of researchers and students, as well as enhancing the employability of graduates from ceiA3 universities.

Promotion and reinforcement of knowledge transfer and outreach to society.

EDUCATION AND TRAINING

The universities of ceiA3 offer a wide range of undergraduate and master's programmes, including the following degrees in the field of **Bioeconomy**:

- 23 UNDERGRADUATE DEGREES
- 35 MASTER'S PROGRAMMES
- 20 DOCTORAL PROGRAMMES
- 14 TRAINING NETWORK COURSES
- +10 COMPANY PROJECTS

Example:

Interuniversity Master's Degree in Circular Bioeconomy and Sustainability (UCO – UAL)

PROJECTS AND INITIATIVES

Researchers and universities within ceiA3 have actively participated in numerous **national and international projects** in the field of **Bioeconomy**, demonstrating the campus's expertise and potential in this area. As examples, here are some ongoing projects featuring the direct participation of the ceiA3 consortium and its **Research Groups**, including **Operational Groups**, **knowledge transfer initiatives**, and **European projects**:
